PROFILE

- 10+ years of experience in designing and delivering enterprise grade web applications, micro services and cloud native solutions
- Proven expertise across the full stack — from Java/Spring and Python backends to containerised and serverless architectures on AWS, Azure, and other cloud platforms
- Skilled at translating complex requirements into scalable, lightweight system designs with a strong grounding in design principles and clean architecture
- A passionate curious technologist who thrives at the intersection of architecture, innovation, and delivery

TECHNICAL SKILLS

Category	Skills & Tools
Programming Languages & Frameworks	Java, Python, Rust, Java Script J2EE, Spring Boot, Spring Webflux, Spring Security
Architecture & Paradigms	Enterprise Web Apps, Microservices, Serverless Functions, Cloud Native Apps
Cloud Platforms	AWS, Microsoft Azure, Pivotal, Heroku
DevOps & Infrastructure	Docker(Containers), Terraform(Infrastructure as Code), Jenkins
Databases	No SQL: Mongo DB, AWS Document DB Relational (Oracle, My SQL)
Version Control & CI/CD	Git, Github Actions, Jenkins
IoT	Pi4j, Constrained Application Protocol, MQTT and

WORK EXPERIENCE

- **Full Stack Developer** | 01-Jul-2019 – till date
IDEXX Laboratories, Ludwigsburg, Germany
 - Designed and developed microservices and serverless functions on AWS Lambda to manage incoming laboratory test orders, track real-time test progress, and deliver results to external interfaces
 - Currently building a cloud-native Plate Design and Quantitative Analysis solution for PCR laboratory workflows, focusing on scalability and precision data handling

- **Software Developer – Java | 01-May-2019 – 30-June-2019**
Canon Deutschland GmbH, Stuttgart, Germany
 - Java developer for COSMOS used in large industrial scale printing by Canon
- **Senior Software Engineer | 13 Jun 2013 – 26 Feb 2019**
Robert Bosch Engineering and Business Solutions Limited, Coimbatore (India)
 - Preparation of technical proposals and solution architecture for new requirements and projects
 - Member of Centre of Excellence, research on evolving technologies and develop the proof of concepts for the upcoming requirements
- **Individual Contributor | 08 March 2010 – 06 Jun 2013**
Oracle Financial Services and Software Solutions, Chennai (India)
 - Responsible for requirement gathering, analysis, implementation of web apps for Investment Banks

EDUCATION

- **Bachelor of Engineering (Instrumentation and Control Engineering) | 1 Jun 2005–30 Apr 2009**
Anna University, Chennai (Dr. Mahalingam College of Engineering and Technology), Pollachi (India)

ACHIEVEMENTS

- Ownership of complete development of the OTC module from scratch in TPS product
 - Did root cause analysis and provided solution for high memory usage of MyHR app, saved the running cost and prevented the application from frequent unavailability
 - Ability to run the Thing Book app across various cloud platforms like Azure and Pivotal
 - Implemented end to end chat bot, integrating Facebook messenger with meya bot via smooch messaging platform
 - Implementation of Spare parts catalogue in a way its services can be consumed by n number of partner systems
 - Volunteered to take up new challenges and provide the best possible dynamic solutions
-
- Best performer award 2017 (RBEI/BSJ) in Thing Book product for successful implementation
 - Best Team award from Sony India in the year 2016 for successful migration of Garata Suite
