

Ajaykumar Dhandapani

Senior Software Engineer – System Design | Web & Cloud Native Applications | AI/ML Integration

🎓 *Graduation : Bachelor of Instrumentation and Control Engineering*
📍 *Ludwigsburg - 71634, Germany | 📞 +49-15171482540 | ✉️ AJAYTECHWORKSHOP@GMAIL.COM*
📄 *Work Authorization: Valid German Residence & Work Permit (No Sponsorship Required)*
🗣️ *Languages: English (Fluent/C1), German (Basic/A2 – actively learning)*

👤 PROFILE

- 10+ years of experience in designing and delivering enterprise grade web applications, micro services and cloud native solutions
- Proven expertise across the full stack — from Java/Spring and Python backends to containerised and serverless architectures on AWS, Azure, and other cloud platforms
- Experience integrating AI/ML solutions into enterprise systems, including LLM integrations and AI-powered application enhancements
- Skilled at translating complex requirements into scalable system designs with a strong grounding in design principles and clean architecture and proactively volunteered complex technical challenges
- A passionate curious technologist who thrives at the intersection of architecture, innovation, efficiency, performance and delivery

🧠 TECHNICAL SKILLS

Category	Technologies
Programming Languages	Java, Python, Rust, JavaScript
Frameworks	Spring Boot, Spring Webflux, Spring Security, Spring AI, J2EE REST API's
Architecture & Design	Enterprise Web Applications, Microservices Architecture, Cloud Native Applications, Event Driven Architecture, Serverless Architecture
Cloud Platforms	AWS, Microsoft Azure, Pivotal Cloud Foundry, Heroku
AI (Artificial Intelligence)	LLM Integrations , Model Context Protocol(MCP), Retrieval-Augmented Generation (RAG)
DevOps & Infrastructure	Docker(Containerization), Terraform(Infrastructure as Code), CI/CD, Git, Github Actions, Jenkins
Databases	No SQL: MongoDB, AWS Document DB Relational :Oracle, MySQL
IoT	Pi4j, Constrained Application Protocol, MQTT

WORK EXPERIENCE

- **Senior Software Engineer** | *01-Jul-2019 – till date*
IDEXX Laboratories, Ludwigsburg, Germany
 - Develop cloud-native Plate Design and Quantitative Analysis solution for PCR laboratory workflows, focusing on scalability and precision data handling
 - Design and develop microservices and serverless functions on AWS to manage incoming laboratory test orders, track real-time test progress, and deliver results to external interfaces
- **Software Developer – Java** | **01-May-2019 – 30-June-2019**
Canon Deutschland GmbH, Stuttgart, Germany
 - Java developer for COSMOS used in large industrial scale printing for Canon printers
- **Senior Software Engineer** | *13 Jun 2013 – 26 Feb 2019*
Robert Bosch Engineering and Business Solutions Limited, Coimbatore (India)
 - Defined technical proposals and architected solutions for new software products, translating business requirements into scalable and maintainable technology strategies
 - Drove modernization initiatives by migrating monolithic applications to microservices and cloud-native architectures
 - Contributed as a Centre of Excellence (CoE) member by evaluating emerging technologies, conducting technical research, and building proof-of-concepts (PoCs) for strategic and upcoming business needs
 - Enabled the portability of the Thing Book application across multiple cloud platforms, including Azure and Pivotal, improving deployment flexibility and platform compatibility
 - Performed root cause analysis and implemented a solution to address high memory consumption in the HR solutions, reducing operational costs and improving system availability by preventing frequent outages
- **Individual Contributor** | *08 March 2010 – 06 Jun 2013*
Oracle Financial Services and Software Solutions, Chennai (India)
 - Began my professional career as a Business Trainee, building strong foundations in software engineering and domain knowledge
 - Contributed to the development of investment banking products, supporting the delivery of business-critical applications and financial solutions
 - Successfully owned and delivered the end-to-end development of the OTC (Over-the-Counter) module from the ground up for the TPS product

ACHIEVEMENTS

- Best performer award 2017 by Bosch in Thing Book product for successful implementation
- Best Team award from Sony Software Development centre in the year 2016 for successful migration of VAIO apps
